A: Hi, good morning. Did you ~~here~~ hear about the lottery winner last night? The man won, what, ~~two~~ two million dollars?

B: NO, three.

A: Three million dollars?

B: Three million. That's a lot of money, isn't it?

Do you think ~~that~~ three million dollars would ~~be~~ make you happy? I'm asking you ~~the~~ this because when you ask people what they need to be happy, many people will answer, more money. We ~~are~~ assume that money ~~was~~ will make ~~us~~ us happier, but is this true? Well, will winning the lottery help you achieve happiness? Today, we're going to look at the idea of happiness, at psychology of happiness. What make some people happy & happier than others.

We'll look at three personality factors that we find ~~and~~ in happy people. To find out about these personality factors, psychologists talk to hundreds of people. Now, first, they asked people how happy they felt, you know, from very happy to not happy at all. Then they asked some more questions. They ~~avared~~ wanted to find out about people's personalities, such as their attitudes about life and so on. They looked at the differences between happy people and unhappy people.
