

Topic 14: Compare the role of men and women in your country.

In my country, men and women have very important roles. Men and women are complementary to each other. Men are the stronger sex, so they are usually seen as the head of the household and chief breadwinner. Women are seen as the nurturer, caregiver her family and women are considered a strong back for men. Men do not usually perform domestic and household tasks. Now everything is changing fast. Women have proved themselves both physically and intellectually equal to men and men also replace women in raising and taking care of the family.

Some cases, men and women have equal roles, they share each other role in life. But somewhere the discrimination between men and women and patriarchal ideology is still happening.
